

**16TH ANNUAL
H.O. NATIONAL
CHAMPIONSHIP RACES**

JULY 11 - 15

AGAWAM, MASS.

Miniature Auto Racing Club

OFFICIAL RACING PROGRAM

I would like to extend a welcome from the miniature auto racing club. As representative of M.A.R.C. I would like to wish all competitors the best of luck on this our nationals weekend. I hope everyone can enjoy the sights of New England along with the competition of race weekend. I think I can speak for all the members of M.A.R.C. when I say that it is both a privilege and a pleasure to be the host group for the 16th annual H.O. National Championship races.

Todd Duda

Our sustaining sponsors are the people, organizations, and businesses that year after year provide the driving force for national HOPRA. If you enjoy the experience of HOPRA racing, these are the people to thank.

Tom Arthur	Steve Medanic	Scale Auto

Dave Haskell	M.A.R.C.	
Justin Kudelka	Madd Bodies	
Bob Lincoln	Minnesota HOPRA	
Jim Macartney	Quicker Engineering	
Peg Scheafer		

THE LEADER IN HIGH PERFORMANCE HO TECHNOLOGY

★ ★ ★ NEW PRODUCTS ★ ★ ★

★ **THE "FORCE" TYCO NEODYMIUM TRACTION MAGNETS** - Why go half-way with your traction magnets when you can have the ultimate in performance? Level 40 Neodymium Iron traction magnets are the strongest available in HO racing! These magnets have the same dimensions as the stock traction magnet and drop straight into a Tyco 440-X2 car with no chassis modifications or gluing required. Provides an incredible increase in car performance.

★ **TYCO "SPLINED" BRUSH BARRELS** - The ultimate HO brush barrel. This threaded brush barrel has knurled splines that press into the bulkhead. The brush barrel will not spin, twist, or pull out when adjusting or tightening heat sinks or set-screws. Install with no modifications required. It's available in:

HT103 - Splined Brass
HT104 - Long Splined Brass

HT107 - Splined Plated Aluminum
HT108 - Long Splined Plated Aluminum

★ **CUSTOM ARMATURES by GARY BEEDLE:**

— "SILVER SERIES" ARMATURE - The very latest from Gary. His "Silver Series" armatures have been tearing up the competition. Knowing the right winding combination along with super low resistance silver wire is the key to it's superior performance.

— NEW "MULTI-LAM" ARMATURE BLANK - Finally available to racers outside the West Coast, this new arm blank that Gary winds on is a thin lam design. The blank is hysol coated and comes with either the standard shaft or optional drill blank shaft designed to fit ball bearings. Gary is now making this blank available with his rewinds so please call for more details.

★ **NEW FRONT TIRES** - Precision molded tire, fits all BSRT front wheels. Medium density elastomeric compound is perfectly suited to all plastic tracks. The .345" diameter is ideal for production and Super Stock cars or can be easily ground to any desired size.

★ **"FAST-TRAX" REAR WHEELS** - Our new delrin rear wheels have a five-hole spoke pattern on the back side of the wheel and have the lowest mass of any HO wheel available. The low moment of inertia of this wheel gives quicker acceleration and braking for increased car performance. These wheels also feature our exclusive lead-in axle hole that self-centers the wheel for perfect alignment and ease of assembly. "Fast-trax" rear wheels are available in the following sizes/styles:

.275 diameter
.300 diameter

.360 diameter
"Edge"

NEW: Narrow width .360 diameter
Unlimited/Open Class wheel

★ **NEW DRILLED CHASSIS with BODY POSTS INSTALLED** - Chassis with our Pro body posts installed. Our exclusive five-step assembly process assures maximum body post retention. All hole locations in the chassis are jig-drilled for consistency and repeatability. Available for Tyco, Tomy, and Rokar.

★ **ARMATURE AND AXLE SPACERS** - Burr-free phosphorus bronze spacers fit standard .059" diameter axles and armature shafts and are non-magnetic. Long-wearing tempered bronze makes an excellent thrust washer between friction surfaces. Available in the following sizes:

HT070 - .003" Thick

HT071 - .005" Thick

HT072 - .010" Thick

★ **TEST TRACK SECTION** - Compact precision ground test track gives a flat precise reference surface for accurate car set-up. Allows accurate setting of guide pin, ride-height, pickup shoe adjustment, and track clearance.

★ **ROKAR HIGH-PERFORMANCE PARTS:**

— INDEPENDENT FRONT END SET - Our popular front wheel set is now available for the 'M-Car'. Independent rotating delrin front wheels, new molded tires, hardened steel axle, and press-on wheel retainers.

— THREADED BRUSH BARRELS - Replacement brush barrels for the 'M-Car' are threaded to allow for easy brush replacement and adjustment. Also, this brush barrel features a locating groove that presses into the chassis and prevents the brush barrel assembly from moving in and contacting the commutator.

— MOTOR BUSHINGS - Direct replacement for the stock plastic units, these brass armature bushings will withstand the heat generated by the 'M-Car'. Armature bushings press directly into the stock chassis.

IN A WORLD FULL OF IMITATORS, THERE IS ONLY ONE ORIGINAL. BSRT!

WELCOME!
&
GOOD LUCK!

To all participants at the 16th Annual H.O. National Championships Races

Thunderbolt Racing will award \$10 cash plus 5 free bodies to any class winners racing Thunderbolt bodies on their car at the 16th Annual H.O. National Championships Races.

Our goal at Thunderbolt is to make a quality product that is not only durable, but detailed to duplicate the actual car. We are constantly adding new, up-to-date body styles to our line. We are always working to improve our body's performance for the amateur and pro racers. We appreciate any and all feedback from you, the racer, the improve our body's performance and durability.
