Tiny cars offer big action at H.O. slot car nationals

by Tom Nelson

The main concourse of South Commons Mall was turned into a scale version of Gasoline Alley this weekend as drivers from nine states and Canada converged on Bolingbrook for the 11th annual National Championship H.O. Car Races.

The 60 drivers competing in both the Amateur and Professional racing divisions at the national meet proved without a doubt that slot car racing has moved out from under the Christmas tree and is not just for kids anymore.

"Most of the drivers here have an interest in auto racing," race director Tom Arthur of New Lenox said. "Maybe they're frustrated Indy car drivers."

The car races were brought to Bolingbrook because the South Commons Mall offered a location near a major expressway and the mall was able to provide the racers with a store front that had the needed number of electrical outlets.

H.O. cars are 1/87th versions of regular sized automobiles. The cars run on slotted tracks and are powered by electrical motors, which derive their energy from pick-up shoes that come in contact with power wires along the track.

The cars and tracks are basically the same as the set-ups available at local hobby shops and department stores. The only difference is that modifications put the price of a professional type slot car in the \$75 to \$100 price range. An amateur style car usually runs in the \$20 price range.

The National Championships for the first time featured both the Amateur and Professional cars. Although both divisions are slot car racing, the difference between the two categories range beyond just the price of the cars.

As the names imply, the Amateur races are open to those drivers that have just starting competing. Once a racer has accumulated a

number of wins or has won the National amateur title, he must move up to the Professional level.

The other difference lies in the fact that the Amateur cars must be stock versions whereas the Professional cars feature custom-built engines.

The engines in the little cars produce big results. Scale speeds of 1000 miles per hour can be reached on straightaways. Actual speeds are 20-25 miles per hour or around 20 feet per second.

Since the fastest car is the winner, the way an engine is built plays a big factor in H.O. racing.

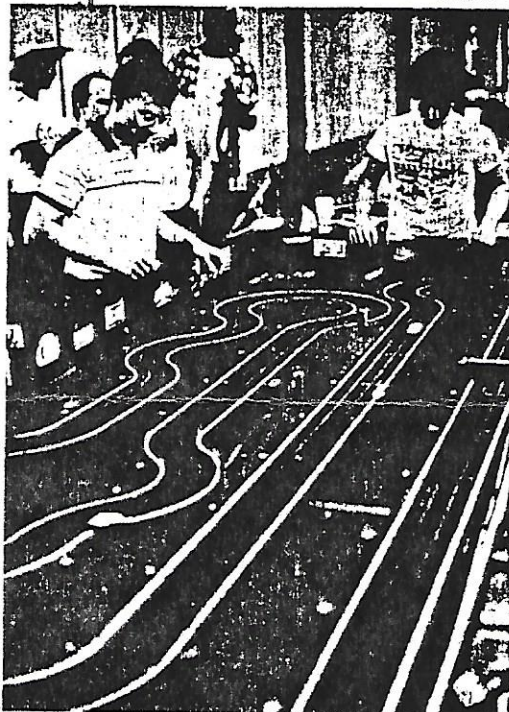

"At the Professional level, it is pretty even between building the engine and driving skills," Arthur said.

Thus, drivers will spend more than 30 hours building each engine and they will continually modify the engine with special parts once the car is in a racing form — much like a full size pit

(Please turn to Page 43, col. 1)

A driver puts a few finishing touches on his car in the "pits" at South Commons Mall on Saturday at the National Championship H.O. Car Races.

(Photos by Tom Nelson)

Amateur racers run their cars through the time trials on Saturday in preparation for the Sunday finals. The National Championships featured both Amateur and Professional class racers.

A trio of drivers intently follow the path of their vehicles in the Professional class time trials on Saturday. Scale speeds of the tiny H.O. cars reach 1000 miles per hour.

crew. A wide range of precision tools is used in this process and paint designs on the body add detailed flair.

"But at the Amateur level, driving skill is more important," Arthur said. "That's where you learn to drive."

Competition at the South Commons meet ran on Friday, Saturday and Sunday with the championship heats taking place on the final day in both categories. Trophies and prizes were awarded to winners, some of which were donated by track and car manufacturer Tyco, which is the only major company still making H.O. car equipment. Aurora, the other big name in the business, recently stopped production of its H.O. cars and tracks.

The National Championships brought together racers from as far away as New Jersey and Montreal. This year's meet was sponsored by the Illinois H.O. Professional Racing Assn. In 1984, the meet was held in Michigan and the year before that it took place in Missouri.

"(The National Championships) gives us a chance to expose the sport," Arthur said. "And by having it in the mall it gives our guys a chance to race in front of the public."

Local racers included Tom Shepherd, Tim Hase, Tim Creswell, Ivan Peel, Dave Woock and Scott Wane from Lockport, Mark Ulrich from Wheaton and Carl Guardia from Joliet.

Dear Tom,

On behalf of Big Brothers/Big Sisters, I would like to thank you so much for all your efforts both Wednesday and Thursday evenings. I have not heard any reports of Thursday's event, I do hope it was successful.

Boy, the kids sure enjoyed themselves on Wednesday night. My niece, RaeLea, still talks about it - she would like to set her brothers little race track up when she returns to Iowa to show her brothers what a good "driver" she is! The trophy, ribbons, pictures, buttons, & caps were all super incentives for the kids to do their best.

I do look forward to setting up an evening of races this fall for our kids. We could arrange to have the activity right in our building. I think September or October would be a good time - after the children are settled back into their school routines.

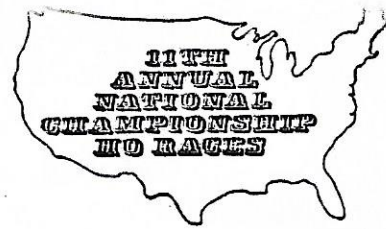

Your generosity and support are so greatly appreciated and helps us to meet the needs of many deserving children from single parent homes.

Sincerely

Barb Harvey
Recreation Coordinator

New Lenox, IL 60451

Dear Tom,

Just a brief note to say thank you for making time to share your model car racing track with us. Anytime we can be in the public and call attention to our need, we increase the chances of finding a Big Brother volunteer to be a friend to a fatherless boy.

I would very much like to pursue the idea of state competition racing at the mall sometime early next year.

Again, thanks for your help.

Gratefully,

Daryl G. Alderson
Executive Director

THE FOLLOWING LIST IS BOUND TO BE INCOMPLETE, FOR THAT I APOLOGIZE, BUT THE PEOPLE WHO PITCHED IN TO PUT ON THE 1985 NATIONALS DIDN'T DO IT TO SEE THEIR NAME IN PRINT. STILL, I'M SORRY IF I MISSED ANYBODY. THIS LIST IS IN ALPHABETICAL ORDER SO AS NOT TO OFFEND ANYONE BY LISTING BY WHAT I CONSIDERED ORDER OF IMPORTANCE. IF FACT ALL CONTRIBUTIONS OF TIME AND EFFORT WERE IMPORTANT IN PUTTING ON OUR EDITION OF THE "NATS". THANKS TO ALL!!!
