DM-1 CHASSIS PAN KIT

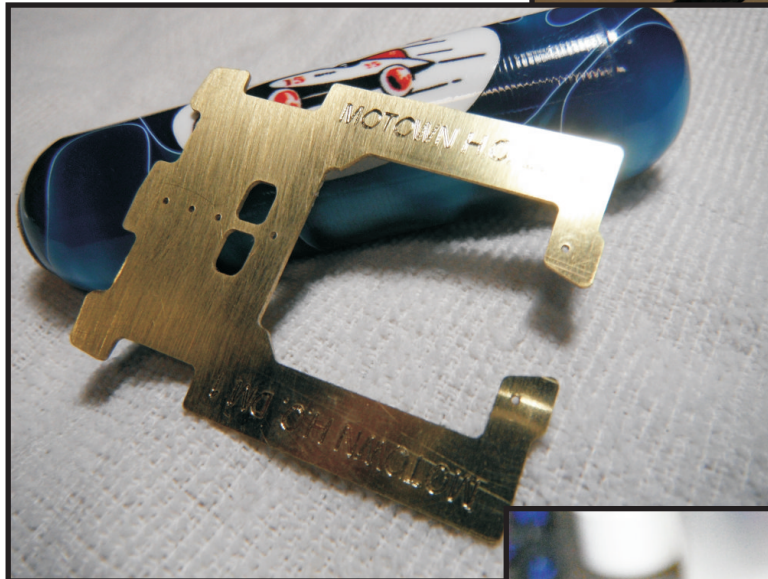

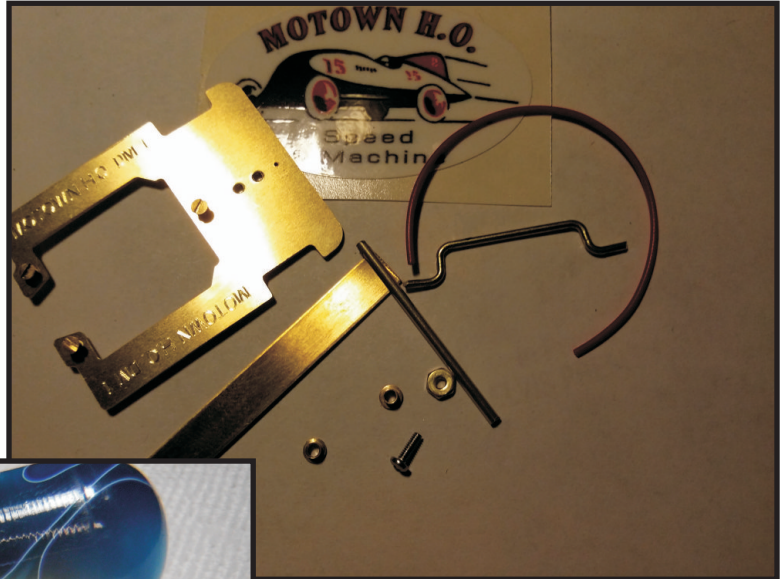

Motown H.O.

DM -1 Chassis Pan Kit for Wiper Style Pickups
This pan has been CAD designed and CNC cut to ensure accurate building, correct hole placement as well as consistent tolerances from pan to pan.

Thanks to Doug Morris for his input, opinions and knowledge while we were designing this chassis pan.

We are continually updating our products, so there may be slight design differences noticed from run to run.

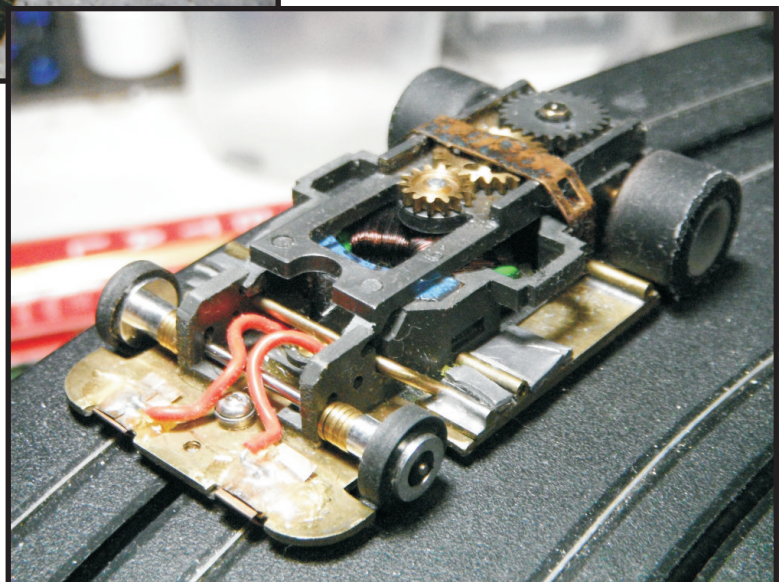

This is to give you, the racer, a better product.

Contents:

- (1) .032" thick brass pan drilled and tapped 0-80
- (3) 0-80 flat head screws pan to chassis mounting
- (1) 0-80 pan head screw and nut for guide pin
- (2) rear axle bushings (requires .082" drill)
- (1) ea length of shaker plate & body mount tubing
- (1) shaker plate mounting rod
- (1) length of bronze for pick ups
- (1) NOS AFX Chassis
- (1) Set of Brush Tubes

COMMUTATOR CLEANER

The Motown H.O. Commutator cleaner is a *MUST* for all pancake racers

This cleaner uses a special compound pad that will not redeposit or contaminate the commutator. The pad may get dirty, but a spray of WD-40 on a rag will clean it with just a few twists.

Colors and patterns may change from batch to batch.
